| Kaz needs a way to "clone" an existing log (including metadata) to one or more servers. Currently gcl_create includes the creation time in the metadata, so each call produces a unique value. A gcl_clone application is needed to make an identical copy on other servers. |             |                        |            |

#### History

---

**#1 - 08/21/2016 01:53 PM - Eric Allman**

- Status changed from New to Resolved

gcl-clone is now in the apps directory.

**#2 - 08/23/2016 03:27 PM - Eric Allman**

- Status changed from Resolved to Closed
