

## GDP - Bug #44

### Router connections should check for conflicting logs

08/21/2016 01:56 PM - Eric Allman

<b>Status:</b>	New	<b>Start date:</b>	08/21/2016
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Category:</b>	Routing Layer	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Description</b>			
When a router accepts a connection from another router that it has not previously seen, it should check for name clashes. This is particularly problematic if someone is testing an environment on a private GDP cluster and then attempts to join the public cluster. Right now, if there are log name conflicts, the semantics are undefined.			

#### History

**#1 - 07/05/2018 09:53 AM - Rick Pratt**

- Subject changed from Router connections should check for conflicting logs to Router connections should check for conflicting logs (net3 router)

**#2 - 07/05/2018 12:35 PM - Rick Pratt**

- Subject changed from Router connections should check for conflicting logs (net3 router) to Router connections should check for conflicting logs

- Category set to GDP Version 0

**#3 - 04/09/2019 12:28 PM - Eric Allman**

- Project changed from Click GDP Routers to GDP

- Category changed from GDP Version 0 to Routing Layer
