

GDP - Bug #50

router will sometimes connect to itself

08/24/2016 02:56 PM - Eric Allman

Status:	Closed	Start date:	08/24/2016
Priority:	Low	Due date:

Category:	Routing Layer	Estimated time:	0.00 hour
Target version:			
Description			
I found a case on gdp-04 where the router had opened a connection to itself. The routing loop was detected but not repaired.			
Also, the router had lost all client routes. It's not clear if this is related or a separate bug.

- Description updated

#2 - 09/27/2016 07:14 AM - Eric Allman

- Priority changed from Normal to Low

Dropping this to low priority because at the moment it doesn't seem to be causing any operational problems.

Might this be a good one to assign to Paul & Derek?
