Description			
On a log with no new appends, leaving a subscription running causes segmentation fault after a while. See a detailed log attached, but here are the relevant parts (with a -D *=50):

History

#1 - 09/28/2016 12:24 PM - Eric Allman

- Status changed from New to Feedback
- Priority changed from Normal to High

This appeared in my recent commit for issue [#54](#). It should be fixed in commit:60e57723. Please double check that it has been fixed.

#2 - 09/29/2016 04:44 PM - Nitesh Mor

- Status changed from Feedback to Closed

Seems to be fixed. I can't reproduce it anymore. Thanks
