#1 - 10/13/2016 12:00 AM - Nitesh Mor

- Related to Support #65: Upgrade gdp-01 to Ubuntu 16.04 added

#2 - 10/14/2016 01:15 AM - Nitesh Mor

- Status changed from New to In Progress

Summary of steps:

- Stopped gdplogd
- Copied all the log data from 1 TB disk to logical volume on 4TB disk
- Pointed /var/swarm/gdp/gcls to LV on 4TB disk
- Currently rebuilding indices on the newly copied data, the original data on 1TB disk serves as a backup in case something goes wrong.
