

GDP - Support #73

Can't write to log edu.berkeley.eecs.bid.mellis.arduino101

10/14/2016 12:03 PM - David Mellis

Status: Closed	
Priority: Normal	
Assignee:	
Category:	
Target version:	
Description	
When I run the following command:	
<pre>./gdp-writer -a edu.berkeley.eecs.bid.mellis.arduino101</pre>	
and enter lines of text, I see no output at all and it appears that no data is written to the log. Reading it gives only:	
<pre>./gdp-reader -s edu.berkeley.eecs.bid.mellis.arduino101 Reading GCL KH7hu-eUA4b05f7H4swuLF27mEEy22jwSXD0GkjHohw</pre>	
I can successfully write to other logs (e.g. edu.berkeley.eecs.bid.mellis.test4) with the same setup. This is on OS X 10.12 (Sierra), latest GDP commit (2023d77857ad557a53cf8d9b044ed94e7c0228f2) with ~/.ep_adm_params/gdp:	
swarm.gdp.routers=gdp-01.eecs.berkeley.edu; gdp-02.eecs.berkeley.edu	

History

#1 - 10/14/2016 12:08 PM - David Mellis

- File *gdp-writer-log.txt* added

Here's the debugging output, which includes an assertion failure and exit that I don't see when running without debugging output enabled. That is, when running without debugging output enabled, the application simply hangs.

#2 - 10/15/2016 02:52 PM - Nitesh Mor

gdplodg on gdp-03 was messed up, I restarted it and it seems to work. What caused this, is still unknown.

One thing to note is that -D can be up to 127, the behavior of the program can change with settings above 100.

#3 - 10/15/2016 10:57 PM - Nitesh Mor

- Tracker changed from *Bug* to *Support*

#4 - 02/08/2017 11:52 AM - Eric Allman

- Status changed from *New* to *Closed*

I'm closing this since it is almost certainly fixed with the gdplodg changes, and David seems to no longer be involved.
