

GDP - Bug #93

client restart after router restart not working

12/21/2016 01:41 PM - Eric Allman

Description			
There's a problem causing clients to not properly retry a command after the router node they are talking with is reset. I believe I was able to fix this in commit:0b60b677, but that's still on a private branch (eric/dev) and hasn't been well tested. It might be worth trying it on swarmnuc1022 (the host running the MQTT-GDP gateway code), since this is sometimes an issue there. I don't want to install it now because I'm on vacation and won't have the time to hover over it.			

History

#1 - 06/25/2018 12:52 PM - Eric Allman

- Status changed from New to Rejected

At this point we have a completely new I/O layer and router, so this issue is obsolete.
